

## Think Self-Service!

Healthcare and Senior Living facilities continually struggle with providing the best patient experience while also balancing heavy staff workloads.

iPad and tablet kiosks provide a variety of use case solutions that are built for durability, ADA compliance, and a compact footprint. With options for branded colors, logos and signage, our kiosks can help increase patient and visitor satisfaction while reducing overhead and labor costs.

### *Typical uses:*

- Secure Visitor and employee check-in kiosks including webcam, visitor badge and ID scanning
- Fever Monitoring and screening questions
- Information, Maps and Wayfinding
- Large display marketing video displays with scrolling daily events
- Employee timeclock
- Food service—tabletop, handheld, and standalone devices
- Registration, surveys, document capture and more

*“Self-service will be an important part of the **new normal.**”*
